# PRESS RELEASE

## MagicDraw UML 11.0 Adds Seamless Eclipse Integration

The highly anticipated MagicDraw release satisfies developers' demand for the UML modeling and software development in a single Eclipse environment

Plano, TX, March 30, 2006. No Magic, Inc.®, a leading vendor of architecture modeling software, today announced the release of MagicDraw® UML 11.0, an upgrade of No Magic's award-winning UML-based architecture tool. MagicDraw 11.0 extends its integration with Eclipse IDE adding capability to model and code in the single environment.

Eclipse IDE is an open-source tool for IT professionals and software developers, and the most popular software development environment led by the Eclipse Foundation. The demand for the UML modeling and software development in the single environment from developers working in Eclipse IDE was vast and growing constantly. Now developers can save their valuable time working with the two leading tools in the single Eclipse environment seamlessly. With the entire release No Magic continues its commitment to bring power of modeling across the overall application lifecycle.

"Eclipse community and MagicDraw users already using Eclipse integration highly anticipated the seamless MagicDraw integration with this open-source IDE. From now on they will be able to increase their software development productivity using the fastest way to create architecture and the most popular extensible development platform," said Gary Duncanson, President of No Magic.

Additionally, the new version adds localization of MagicDraw Graphical User Interface in Russian to already existing support in nine languages.
