PRESS RELEASE

New version of the leading UML tool offers free UML reader and IntelliJ IDEA integration

Golden, Colorado – November 10, 2003 – No Magic, Inc.®, a leading object-oriented tools company, today announced the release of MagicDraw UML 7.1, the latest version of its UML modeling and forward and reverse engineering tool. This versatile development tool increases productivity of and communication among business and software analysts, architects, programmers, quality assurance engineers and documentation writers.

For the first time in the industry, No Magic features a free UML reader that allows to read and print MagicDraw UML diagrams. The MagicDraw Reader edition is made for reading and previewing UML models created with all versions of MagicDraw and is free of charge. It is extremely useful when you want to share your ideas expressed in UML with partners, colleagues, or clients, who do not have their own copy of MagicDraw. The Free Reader edition is also fully equipped with printing and image export capabilities, and can be downloaded at www.magicdraw.com

MagicDraw UML is now integrated with IntelliJ IDEA 4.0 (Aurora build #963), a top-rated Java development environment. This integration completes No Magic's integration efforts with all Top 5 Java IDEs; Borland JBuilder, IBM Eclipse, Sun ONE Studio 4 and NetBeans. Now users can keep the code synchronized with the model and have all UML diagrams in their favorite IDE.

"We now recommend MagicDraw UML as our modeling tool of choice for our clients, especially with the new Reader in version 7.1." indicated Spencer Roberts, President of Titus Corporation. "MagicDraw UML is faster, more UML-compliant and saves us time over expensive tools. It now works with all the major IDE's, which benefits both our team and customers."

MagicDraw UML Version 7.1 also features:

- o **Export diagram images using Open API.**
- o **Reports generation from console without running MagicDraw.**
- o **Fixed positions for links on shapes:** connection points may be selected strictly from the middle of the shape side or from the edge.
- o **Help window modality fixes.**

About No Magic

Founded in 1995, No Magic Inc. is headquartered in Golden, Colorado with operations worldwide. In 1998 No Magic released MagicDraw UML version 1.0, the first large scale application completely developed in Java, earning Sun's "100% Java Application" credential. In addition to continued development of MagicDraw, No Magic, Inc. also provides software development outsourcing services from its software development facilities in Kaunas, Lithuania and Bangkok, Thailand.

Additional Information

MagicDraw UML 7.1 is now available for purchase. For additional feature set information, complete pricing details, or to download a fully functional demo, visit http://www.magicdraw.com/.
